## Medical Forms

You can either have your Pediatrician fax/email us over the medical/immunization records or you can drop them off/email/mail them to us! Most Doctor's offices prefer for forms to be picked up; however, it often takes extended time, so please plan accordingly.

Even if we have your child's medical/immunization records from the past year, we need the most **UP TO DATE** records. Please be mindful that any time you visit the Doctor for your child's yearly checkup, we will need an updated copy brought in to us!

## Potassium Iodide(KI) Refusal/Opt-Out Form

Potassium Iodide (KI) is a chemical that can protect the thyroid from radioactive iodine. In the event of a nuclear event that releases radioactive iodine into the atmosphere, KI can be used to flood the thyroid with stable iodine in order to prevent or reduce the amount of radioactive iodine the thyroid can take in. If there is a nuclear emergency, evacuation and sheltering are the first options. Administration of KI would only occur when recommended by the County and/or State Department of Health in a radiological emergency.

The New York State Office of Emergency Management (NYSOEM), working with county officials, has made KI available to childcare providers in the areas surrounding the Indian Point, Nine Mile/James A. Fitzpatrick, and Ginna Nuclear Power Plants.

If you DO NOT want your child given Potassium Iodide (KI) in the event of a radiological emergency, complete this form and return it to your childcare provider.
